Reset Activations

Slide 7: What Went Wrong

- Time management: balancing group project, course projects, and planning for next semester
- Difficulty deciding how to lay out the project
- Querying appropriate data and relearning MongoDB

What Went Well

- Found a dedicated GitHub repository for necessary data

Slide 8: Sprint Results

Sprint 1

- Lines of code: **400**
- Individual features completed: **2/6**
- Individual requirements completed: **2/3**
- Individual burndown rate: **35%**

Sprint 2

- Number of features planned: **4**
- Number of requirements planned: **1**

Slide 9: What's Next

- Implement basic rule descriptions for NCUs
- Show attachment order icons for units
 - Implement other special abilities for unit's attachments.
- Improve UI

Slide 10: Timeline

- **Projected Finish Date: 11/28**
- Implement attachment data and improve UI
